English: Oktoberfest is the world's largest beer festival held annually in Munich, Germany. It is a 16-18 day event that attracts millions of visitors from around the globe. People come together to enjoy traditional Bavarian beer, food, music, and dance. The festival showcases various beer tents operated by different breweries, each offering their unique Bavarian beer flavors. Traditional German dishes like pretzels, sausages, roasted chicken, and sauerkraut are also served. The festive atmosphere is filled with joy, laughter, and camaraderie. Oktoberfest is a wonderful celebration of Bavarian culture and a great way to experience German traditions.

German: Das Oktoberfest ist das größte Bierfest der Welt, das jährlich in München, Deutschland stattfindet. Es ist eine 16-18-tägige Veranstaltung, die Millionen von Besuchern aus der ganzen Welt anzieht. Die Menschen kommen zusammen, um traditionelles bayerisches Bier, Essen, Musik und Tanz zu genießen. Das Fest präsentiert verschiedene Bierzelte, die von verschiedenen Brauereien betrieben werden und jeweils ihre einzigartigen bayerischen Biergeschmacksrichtungen anbieten. Traditionelle deutsche Gerichte wie Brezeln, Würstchen, gegrilltes Hähnchen und Sauerkraut werden ebenfalls serviert. Die festliche Atmosphäre ist erfüllt von Freude, Gelächter und Kameradschaft. Das Oktoberfest ist eine wunderbare Feier der bayerischen Kultur und eine großartige Möglichkeit, deutsche Traditionen zu erleben.

Chat response to the Query "oktoberfest"

Sample Output Contd...

Multilingual Chat assistant

Chat response to the Query "oktoberfest"

Libraries file: requirements.txt

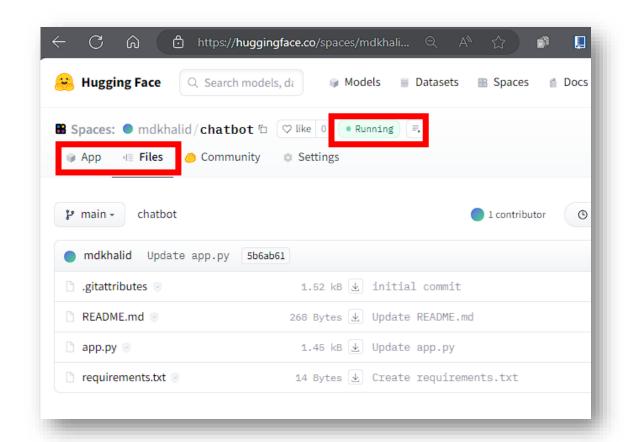

- Openai
- Gradio

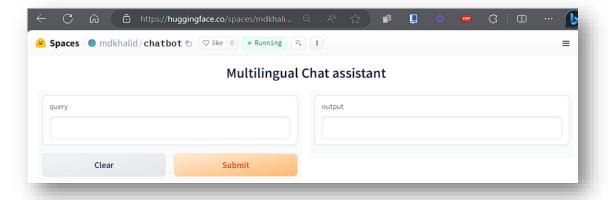

Defining the GPT function and Prompt file: app.py

```
messages = [{"role": "system", "content": "Allow the user to input their
query in any language you can understand. Generate 3 responses each in
English, German, and Hindi using 200 words or less. Provide the word count
and character count of the generated text after each language output."
def CustomChatGPT(query):
   messages.append({"role": "user", "content": query})
   response = openai.ChatCompletion.create(
       model = "gpt-3.5-turbo",
       messages = messages
   ChatGPT reply = response["choices"][0]["message"]["content"]
   messages.append({"role": "assistant", "content": ChatGPT reply})
   return ChatGPT reply
```

Development process

- 1. Create a requirements.txt file containing all the required libraries(shown in first slide)
- 2. Create app.py with the chatgpt api call function and prompt engineering (shown in previous slide)
- Create account on huggingface and create a space with a suitable user name. Huggingface spaces are place to host your ai model for free.
- 4. Upload the file with name app.py and requirements.txt on the huggingface space that you created "chatbot" in this case (see screenshot)
- 5. Commit the changes and huggingface will run your code and build a live interface to test your code. If everything is ok the website will display a green bullet dot saying running(see the red rectangle in screenshot)
- 6. Click on App icon to view your output interface (see the red rectangle in screenshot)

Links to the space
